**Lens Design**

- The Hoskins-Barkan Goniotomy Lens was primarily designed for transverse goniotomy surgery with the operating microscope, but can also be used as a diagnostic lens.
- The infant lens is oval and conical in shape, with a 10mm diameter magnified view of the anterior chamber and anterior chamber angle.
- The premature infant lens is the same in shape and design except the dimensions are 1mm smaller for premature infant surgery.
- There is also an adult size at 11.5 mm diameter.

**Cleaning**

Rinse: Immediately upon removal from patient's eye, thoroughly rinse in cool or tepid water.
Wash: Place a few drops of mild soap on a moistened cotton ball. Gently clean with a circular motion.
Rinse: Thoroughly rinse in cool or tepid water, then dry carefully with a non-linting tissue.
Then: Proceed with either disinfection or sterilization instructions.

**Disinfection**

- **GLUTARALDEHYDE**
  - 2% or 3.4% aqueous solution
  - Temperature per manufacturer instructions
  - Minimum exposure time = 20 minutes

- **BLEACH**
  - 10% solution mixed at:
    - 1 part bleach to 9 parts cool tepid water
  - Recommended exposure time = 10 minutes

**Caution** To avoid damage to the lens, do not exceed recommended exposure time.

Then: Rinse lens thoroughly to remove disinfection solution.
3 cycles of 1 minute, with cool or tepid water is recommended.
Dry carefully and place in a dry storage case.

**NOTE** This lens is known to be compatible with: Asepti-Wipe, Cavi-cide, Cidex, Cidex OPA, DisCide Wipe, Enviro-cide, H$_2$O$_2$ - 3%, and Opti-Cide

**Sterilization**
